

Fabrication and Modularization

Flint's Fabrication and Modularization division is responsible for fabricating large and complex modules for customers in oil sands extraction (SAGD, CSS and mining), upgraders and facilities, gas plants, power generation, utilities, co-generation, and forestry. Our state-of-the-art fabrication facility and storage yard is strategically located in Sherwood Park, Alberta on the high-load corridor and is the largest facility of its kind in Canada.

Flint's reputation is based on consistently delivering projects on-time, on-budget and with the highest level of safety in the industry.

FABRICATION FACILITY

- 125,000 sq. ft. indoor fabrication shop—carbon and alloy pipe spool
- Capacity to complete in excess of 16,000 FDI/week by using a five day work shift
- Capacity for 120 modules—24' x 24' x 120' module size
