Fluid Hauling

Flint's Fluid Haul division delivers oilfield and industrial cleaning services through several of our Western Canadian operating centres. Flint employees who work in the field providing pressure, vacuum and fluid hauling services receive comprehensive training in safety and are accredited in high-pressure and vacuum service delivery in accordance with industry standards and guidelines.

PRESSURE

- Loading wells
- Support perforating/wire line operations
- Flushing flow lines
- Hydrotesting and pressure testing
- Downhole pumps and tubing
- Production tank cleaning—stinging, door pulls
- Service rig support—flushing rods, blowing drains, killing gas, rig run-on
- Well stimulating and acidizing
- Flush-by

FLUID HAULING

- Frac tank fills—cold (heated) water, KCl, methanol
- Off-trailer fracing
- Production hauls—oil and produced water
- Clean oil hauls—batteries to pipeline
- Road spraying
- Calcium water
- Corrosion inhibitor

VACUUM

- Oil and water hauling
- Production tank cleaning—stinging, door pulls
- Wellhead and environmental cleanup
- Oily sludge and sand disposal
- Emptying sumps
- Pipeline pigging
- Blowback and coiled tubing tank cleanouts
- Service rig support—mud cans, rig tanks, bailing carts, rig circulation

INDUSTRIAL CLEANING

- High-pressure water blasting (10,000 - 40,000 psi)
- Hydro-excavating
- Chemical cleaning
- Oil spills and environmental clean up
- Bundle blasting
- Rotary lancing
- Roto fan
