

Pipeline Construction

Flint provides pipeline construction and maintenance services across North America. Our employees are qualified operators, apprenticeship and journeyman trades-persons, and skilled labourers. Our construction experience is vast from small diameter tie-ins to large diameter cross country pipelines - from conventional natural gas to heavy oil. Flint constructs and installs a wide range of pipe including: plastic, composite and steel using the right equipment and knowledgeable teams. Flint will deliver on your project needs, all with the highest regard for safety and environmental protection.
